

New Era Roofs

The Price & Value Guarantee

Step 9 · Delivered verbatim, BEFORE any price is shown · KPI 15

*“Now, before we jump into the elephant in the room, which is your investment, I want to share with you one of the reasons I work for this company and why I love this company so much... and it’s our **Price & Value Guarantee**.”*

*“A few years ago our owner wanted to change the way people bought home improvement. He wanted to bring peace of mind back into the home improvement process, and the way he is going to do this is by allowing you to go ahead and take advantage of the discounts and incentives we have available while I’m here today — and he’s going to continue to let you shop us out until the day of the install.
[Homeowner name], have you heard of anybody that offers that?” (Wait for answer.)*

*“Yeah — so what it says, Mr. Homeowner, is that if you find someone that does **EXACTLY** (pause) what we do and **EXACTLY** (pause) how we do it, and they can do all that for less than what I’m about to show you, then I need you to bring that back to me in writing, and we will refund you the difference — plus I’m going to give you **\$100** for the fact that you found someone that I haven’t spoken to or learned about... So is that the peace of mind you’re looking for when you first called New Era Roofs?” (Wait for answer.)*

The rules that govern it

It comes before the numbers. Guarantee first, then retail prices Best — Good, then discounts Best — Good. Skipping it caps KPI 15 at ⚠️.

The two EXACTLYs are the teeth. Exactly what we do AND exactly how we do it, for less, **in writing** — then the refund of the difference plus \$100.

It’s the unfair advantage on shop-around objections. The customer can shop us until install day — so “we want more estimates” is met with the guarantee, not with pressure. Cheaper becomes their homework, not our problem (Scenarios 2, 3, 11).

After it lands: PRESENT PRICES. BE QUIET.
